SUMMARY

Data Scientist / ML Engineer with **6+ years** taking ML from idea to production: streaming anomaly detection, LLM applications and cloud-agnostic MLOps on AWS and GCP. MSc in AI and Statistics. I love what I do and keep learning so that every project is better than the last.

EXPERIENCE

Deutsche Telekom — Thessaloniki, Greece
Senior Data Scientist — *Sep. 2024 – Present*

- Design and maintain a **production outlier-detection framework** for streaming telecom data, built on state-of-the-art methods.
- Re-engineered the data-processing pipelines on Polars (multi-threaded, columnar engine), cutting end-to-end execution time by **80%**.
- Ported every legacy SageMaker pipeline to **Airflow DAGs**, decoupling orchestration from the vendor: the same workflows run on AWS SageMaker and GCP Vertex AI.
- Introduced GitLab CI/CD, automated tests and **mandatory static type checking**, raising code quality and delivery speed.

Altair Engineering — Thessaloniki, Greece
Senior Data Scientist — *Oct. 2021 – Aug. 2024*

- Built **LLM-based Text-to-SQL** that translates natural-language questions into SQL for conversational data exploration in Altair's analytics platform.
- Developed an **NLP chatbot** over the product documentation for self-service user support.
- Led end-to-end development and testing of **MLOps and AutoML features** (model management, automated training), improving efficiency, accuracy and scalability.
- Shaped the analytics-suite roadmap across multiple releases.

Deus Ex Machina AI — Thessaloniki, Greece
Data Scientist — *Feb. 2020 – Oct. 2021*

- Built AutoML tooling that automates model search and tuning, cutting model iteration cycles by **40%**.
- Built an NLP pipeline combining Transformer models with clustering for entity-relation extraction across **100,000+ biomedical articles**.
- Developed ML models for **early disease detection** to support personalized interventions.

EDUCATION

Aristotle University of Thessaloniki, Greece

MSc Artificial Intelligence — *2018 – 2020*
GPA 9.59/10 · **2nd-highest in cohort**

MSc Statistics — *2018 – 2021*
GPA 8.98/10 · first-class honours

BSc Mathematics — *2013 – 2018*
GPA 8.13/10 · commendation, **top 5% of class**

SKILLS

Programming
Python · SQL · C++ / CUDA · R · Java

ML & LLMs
PyTorch · TF / Keras · scikit-learn · Transformers · LangChain · spaCy

Data Engineering
Polars · PySpark · BigQuery · dbt · Airflow · FastAPI

MLOps & Cloud
MLflow · SageMaker · Vertex AI · Azure ML · Docker · Kubernetes · Terraform · GitLab CI/CD

BEYOND WORK

Outside work I keep learning by digging into ML internals, maths and Python performance, and writing about it on my blog:

- Fast Softmax in CUDA
- Pruning ML models
- NumPy vs Numba vs Cython
- Bayesian Optimization

AWARDS & CERTS

2023 **1st Place** Prediction Agent Hackathon
2024 **Data Engineering, MLOps** DeepLearning.AI
2023 **Applied DevOps** IBM
2023 **Oxford ML Summer School**

RESEARCH

2020 **Time-series forecasting** MSc AI thesis
2021 **Monte Carlo methods in DL** MSc Statistics thesis
